CREE HYMN BOOK

REVISED AND CORRECTED BY

REV. JOHN McDOUGALL,

ALSO A NUMBER OF ADDITIONAL TRANSLATIONS BY THE
SAME, AND WRITTEN IN THE SYLLABIC
OR CREE CHARACTER

BY THE

REV. E. B. GLASS, B.A.

TORONTO:
METHODIST MISSION ROOMS,
1888.

ALPHABET.

(a) SYLLABICS.

▽ ā	△ ē	▷ ō	◁ ä *
∇ pā	∧ pē	> pō	< pä
U tā	∩ tē	⌋ tō	⌈ tǎ
∩ chā	ρ chē	∪ chō	⌊ chǎ
q kā	ρ kē	∪ kō	⌊ kǎ
∪ nā	σ nē	∪ nō	∪ nǎ
∩ mā	∩ mē	∩ mō	∩ mǎ
∪ sā	∪ sē	∪ sō	∪ sǎ
∪ yā	∪ yē	∪ yō	∪ yǎ

* a, as in far.

yd
+B
~g

(b) APPENDAGES.

˘ = n, as in ρ˘˘, it is cold.

˙ = m, " ˆ˙˙˙, sun.

ˆ = s, " ˙ˆ˙˙˙, boy.

˙ = p, " ˙˙˙˙, duck.

˙ = k, " σ˙˙˙˙, he leaves me.

˙ = t, " ˙˙˙˙, tooth.

˙ = ch, " ˙˙˙˙, very.

˙ = w, when placed immediately
to the right of a syllable,
as in σ˙˙˙, my wife.

˙ = i, when placed higher to the
right, as in σ˙˙˙˙, my
coat.

˙ = wī, combining the value of
each point as given above,
as in ˙˙˙˙, k̄ā-kwī.

" = the rough breathing, or aspirate, as in $\wedge^{\text{h}}\text{d}$, ashes.

\times = a combination of " and v , that is, of the aspirate and k, as in $\text{r}\wedge^{\times}$, at the river.

z = r, as in bz^{h} , Christ.

z = l, " $\nabla\text{p}\text{z}$, angel.

\circ = .oo, " $\alpha\text{V}\circ$, man.

When "." and "o" are placed to the right of a syllable, as in $\wedge\text{p}^{\text{h}}\text{q}\circ$, the value of "." is absorbed by the syllable, while that of "o" is affixed. Written in Roman characters the word $\wedge\text{p}^{\text{h}}\text{q}\circ$ will illustrate:—pe-kis-kwāoo; "w" is within the syllable, and "oo" is affixed to it. The value of ":", which appendage must be placed after the syllable it affects, is always absorbed except in the case of $\nabla\cdot$, $\Delta\cdot$, $\triangleright\cdot$, $\triangleleft\cdot$, in which, though

“.” is affixed in position, its value is prefixed. The above combinations are pronounced, wā, wē, wō, wä. The absorbed and the prefixed values of “.” are met with in the word $\Delta \cdot \wedge \rho \wedge q \cdot o = wē-pē-kis-kwāoo$, he wishes to speak.

It will be noticed that there are quantities between ∇ and \triangleleft , \vee and $<$, &c., less full than those given in the Alphabet. When quantities similar to the alphabetical ones are very necessary in the pronunciation of a word, the period “.” is placed directly over the long or broad syllable, $\sigma b \dot{\rho} \cdot (\dot{L}) = ni-kä-kwē-tä-män = I$ shall be in need. $\nabla d (\sigma b \triangleleft \dot{i}) = I$ shall be there; here the last syllables are “ä” and “yän,” both broad. $b \triangleleft \dot{i} \triangleright =$ where you are. The last “ \triangleright ” is not broad, $kä-ä-yä-yun$.
